

*A Better Feminine Life*

*Virtually painless, almost no downtime,  
Quick procedure with immediate results*

## What is FemiLift?

FemiLift is breakthrough technology using an Alma CO<sub>2</sub> laser to deliver fractionated thermal energy to assist in the vaginal mucosal revitalization. Alma Lasers which manufactures the technology is the worldwide leader of aesthetic and surgical laser technologies.

### Why do I need FemiLift?

Due to the aging process and childbirth, vaginal tissue can change leading to a variety of uncomfortable symptoms including pain, itching, and heaviness.

### How would you describe the procedure?

The procedure is performed by inserting a probe into the vagina with a 360 degree rotation capability. This probe delivers thermal energy while simultaneously being inserted.

### How long does the treatment take?

Each treatment takes approximately 10 minutes. We recommend 3 treatments every 4 weeks for optimal results.

### Are there any side effects?

The FemiLift procedure is a virtually painless procedure without surgery, anesthesia, or downtime.

### Do I qualify for the procedure?

We recommend that you schedule a FREE consultation with the Doctor. At that time, the doctor will review your medical history and advise you if you qualify.
